

MAKE APPLICATIONS FOR THEIR PASSPORTS

Chattanooga Is Allotted Fifty
Y. M. C. A. War Secretaries.

An increased number of assistant secretaries for the Y. M. C. A. has recently been called by the national war work council of the Y. M. C. A. Of this number 150 have been allotted to Tennessee, of which fifty were allotted to Chattanooga.

The following gentlemen have been accepted and have already made applications for their passports: Alpha Waters, Rev. C. W. Kelley, Stephen Doughton, John Edington Gilbreath, Charles Park, Rev. Edward Lee Grace, Clark Edward Bradford, William Walter Vaughan, Floyd Ernest Clausen, Ira Jay Beard and Fredric Earl Colville.

Application for passports is made through the clerk of the federal court, who is furnished by the department of state with blank forms for that purpose. Each application must be made out in triplicate and attached to each of the three forms there is required to be a photograph of the applicant, which must be three inches square and printed on a white background. In addition to this, a fourth photograph must be furnished, upon which the applicant must sign his full name. This fourth photograph is affixed to the passport by the department of state. Each applicant is also required to file with the clerk a certificate of birth, which must show the place and date of

applicant's birth. In a state where vital statistics are not kept, a simple form of affidavit from the parents of the applicant, or some one having knowledge of the facts, is accepted as a certificate of birth. The applicant must file with the clerk the letter from the national war work council of the Y. M. C. A. directing him to report. A fee of \$2 is charged with each application for passport, one dollar of which goes to the bureau of citizenship, department of state, and the other dollar is retained by the clerk as his fee.

All of the applicants named above have either left Chattanooga this month, or will leave within the next few days. They will report at the national war work council, Y. M. C. A., 347 Madison avenue, New York, where they will complete their preparations for sailing.

Each of these applicants signed up for at least one year's service with the Y. M. C. A. for duty either in France or in England, and some of them signed up for the entire duration of the war.

Each applicant is required by the national war work council, Y. M. C. A., to carry not less than \$5,000 life insurance, and each is paid a fixed salary and expenses.

Among the applicants mentioned above will be recognized a number of well-known Chattanooga citizens.

SAYS IT ACTED LIKE A CHARM

Coughs, colds, sore throat or bronchial troubles which persist at this time of the year usually are of an obstinate character. That is all the more reason why a truly reliable remedy like Foley's Honey and Tar Compound should be used. Mrs. Margaret Smale, Bishop, Calif., writes: "Foley's Honey and Tar is a grand remedy; more than I claimed for it. I was suffering from a cold last week and used the medicine and it acted like a charm." Contains no opiates. Joe Anderson, druggist, Chattanooga, Tenn.—(Adv.)

CLEANSING CITY AND SUBURBS IN FIGHT TO BLOCKADE SUMMER FEVERS

Health Authorities Show Remarkable Progress—Draining Ponds and Oiling Damp Places—Milk Situation Also Much Improved. Many Dairies Now Pasteurize and Take Other Sanitary Precautions—Food Establishments Closely Watched.

Work has been progressing rapidly during the past month in the malaria control work which has been organized by the United States Public Health Service. Dr. C. P. Knight, the officer in charge of the service, states that the work is not only well organized in the city, but that it has been established throughout the zone. This task has been placed under the supervision of Arthur E. Gorman, who is employing an average of fifty laborers.

Dr. Knight has the malaria control work divided into three zones. This is in order that full protection may be provided for the troops stationed at Chickamauga. The organization, which has just been completed, takes in the following territory in the three zones:

Zone 1.—From the southern boundary of the city to Boyce station in East Chattanooga. This also includes North Chattanooga and Hill City, comprising a total of eight square miles.

Zone 2.—From the southern boundary of zone 1 running south to the southern boundary of Rossville; thence running west to Lookout mountain. This zone includes the suburbs of East Lake, Rossville (Tenn.), Alton Park, St. Elmo and the city of Chattanooga. The total area is fifteen square miles.

Zone 3.—From Rossville (Ga.) south to Chickamauga, Ga., and a two-mile zone surrounding Chickamauga Park.

In speaking of this work Dr. Knight says that besides these zones which have already been mapped out others will be taken up as soon as possible. All zones are supplied with a field inspector, whose duty it is to make a survey and direct the work in his zone. An oiling squad of four men and a foreman is at work in each district oiling all probable breeding places which they have been unable to drain. However, it is Dr. Knight's desire to drain all possible places in order to furnish a permanent protection.

The two large ponds which have been drained by the Public Health Service are Cemetery Park, adjacent to the National Cemetery; Montague pond, which is being supplied with a sewage system for a drainage protection in a permanent way.

Cleaning Up Suburbs.

In extending the work into the territory outside of the city limits the workers have just finished draining two swamps in East Chattanooga, which were in a very insanitary condition. The engineer in charge is now making preparations to clean out McFarland's Lake, located at Ros-

ville. This lake has been in a serious insanitary condition for years, and has been the source of much complaint. The plan is to clean the lake and deepen it in such a way that the water will flow more freely and that the fish which are now in the water will be able to get to all parts of the lake.

Review of Milk Situation.

In going over the milk situation Dr. Knight says that the result of a complete survey of the situation shows that at the beginning of the work there were only three pasteurizing plants in the city and that the greater part of the milk supply was raw. He states that by intensive work there have been added four additional pasteurizing plants and four plants which sell only pasteurized ice cream. He says that the investigation shows that all of these places have installed the latest pasteurizing plants with time and temperature recording apparatus. In order that these plants may be kept in the very best of condition a weekly record is kept and they have found all of these in satisfactory condition, except on rare occasions.

At the pasteurizing plants the latest reports show that the highest bacterial count was 60,000, which is considered very low.

Dr. Knight states that all of the raw milk dealers have had their cattle tuberculin tested, and all but two or three are now using the small-mouth pail, and all except two are sterilizing utensils efficiently. He also states that about half are using the city water, but the remainder get their supply from springs or wells which, on laboratory analysis, show contamination. However, Dr. Knight hopes that by the proper sewage installation that these springs will show up better.

In giving an estimation of the milk supply coming into Chattanooga he

said that approximately 80 per cent. of the milk sold here is pasteurized, while only about 50 per cent. pasteurized is on market in the rest of the zone.

Food Supply Control.

In a review of the food conditions in this zone it is shown that Dr. Knight's department is co-operating with the city health department and inspecting all food establishments regularly. Accurate scores are kept on these places, and if a consistent breaking of the regulations is carried on the certificate of approval is removed and the owner either prosecuted or a provost guard placed before the place to prevent soldiers patronizing it. During the month of May Dr. Knight pointed out that eighteen prosecutions for the non-observance of the city and federal regulations were made.

Perrol Davis

a colored girl of Tampa, Florida, uses

Nelson's Hair Dressing
She tried many preparations, but found nothing to compare with NELSON'S. The picture tells the story.

NELSON'S is the original and genuine Hair Dressing that is recommended and sold by druggists, and used by colored girls all over the United States.

NELSON'S makes curly, stubborn hair soft, glossy and easy to manage.

Take this advertisement to the drug store and be sure to get the genuine NELSON'S—the price is still 25 cents.
